

82-45-702

GORMAN-RUPP WHEELSET

The Gorman-Rupp 82-45-702 Wheelset is a diesel-driven self-priming pump set with an EU Stage V engine and sound-attenuated enclosure, delivering reliable performance on site.

TARE WEIGHT

Approx. 261 kg

ENCLOSURE

Steel enclosure, with removable sound-reducing cover

FUEL TANK

12 liters

PUMP

The Gorman-Rupp 82H52 self-priming centrifugal pump

ENGINE

Kohler KDW702 watercooled 4-stroke 686 cc 2-cylinder diesel engine

IMPELLER

7.12" cast iron impeller

PERFORMANCE

Max. 45 m³/h flow or 64 mwc head

DIMENSIONS

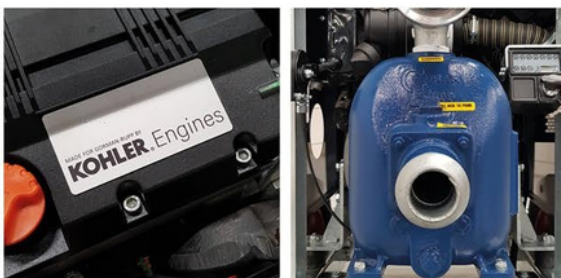

2" x 2" BSP-T connection size, 19 mm solid handling

CLEANER AND MORE ECONOMICAL

The set is now equipped with a water cooled 2-cylinder diesel engine which complies with EU Stage V emission regulations, and is more economical, cleaner and more silent than ever.

The heart of this set, the Gorman-Rupp 82H52 pump, has remained and has a proven reliable track record. Equipped with the new engine, the center of gravity has changed. The 82-45-702 is even easier to move and more maneuverable than before. The pump set is equipped with an enclosure, to further reduce sound levels and to ensure moving parts are adequately protected.

No matter if it concerns pushing jetting tubes for well pointing into the soil, high pressure cleaning or other contractors' pumping applications: the 80 Series pump has always been a popular choice at construction and industrial sites.
